

RV TOILET BASICS

- YOUR RV TOILET IS NOT LIKE YOUR TOILET AT HOME.
- WASTE FROM THE TOILET GOES STRAIGHT INTO A HOLDING TANK.
- THE SECRET TO A HAPPY RV TOILET IS **LOTS OF WATER, MINIMAL TP.**
- NOT ENOUGH WATER, AND THE HOLDING TANK GETS PLUGGED UP!

HOW TO USE AN RV TOILET*

STEP 1: DO YOU HAVE POO PRIVILEGES? FOR ANY NUMBER OF REASONS AN RV OWNER MAY NOT WANT YOU TO USE THE TOILET.

STEP 2: WATER! BEFORE YOU DO #2, ADD A SMALL AMOUNT OF WATER TO THE BOWL.

STEP 3: DO YOUR BUSINESS. USE AS LITTLE TP AS POSSIBLE, NEVER PUT ANYTHING ELSE IN THE TOILET!

STEP 4: MORE WATER! ADD MORE WATER TO FILL THE BOWL BEFORE YOU FLUSH.

STEP 5: SEND IT! STEP ON THE PEDAL TO FLUSH.

STEP 6: MORE WATER! IF YOU WENT #2, FOLLOW UP WITH ANOTHER FULL BOWL OF WATER. USE THE HAND SPRAYER TO TAKE CARE OF ANY LEFT OVER BITS.

* THIS ASSUMES YOU ARE USING A SEWER HOOKUP. IF NOT, THAT CHANGES THE GAME. ASK THE RV OWNER!

"#1, ONE FLUSH WILL DO. #2 BETTER USE TWO!"
